

Key Cabinet Solution

Glory KBS-130G

Make sure your keys are safely and properly managed with Glory's intelligent key cabinet system.

The incredibly robust design and advanced system technology of **Glory KBS-130G** offers highly secure key storage and fully-controlled access to all the rooms & facilities around your premises.

Effective & Highly Secure Key Management Solution for everyday use

Before work

During work

End of work

After work

Managers remove the Key Cabinet from the safe/ vault. The Cabinet is then unlocked to allow daily access for authorized staff.

Authorized staff can retrieve and return the keys by themselves, allowing safe yet reliable key storage without managerial supervision.

Managers confirm if all of the keys are returned before locking the door of the Cabinet. Subsequently, the Cabinet will be placed in the safe/ vault.

Once the safe/ vault is locked, other staff cannot access the Key Cabinet.

WHAT MAKES THIS PRODUCT DIFFERENT?

Built to Last

Manufactured with premium quality & technology from Japan, Glory ensures efficient investment due to highly durable unit with much longer lifetime.

If a key has not been returned to the Cabinet, the Cabinet door cannot be set to closed, ensuring that all keys are properly returned at pre-defined time.

Complete Security Control

Strict User Authentication at the time of key retrieval/ return and door opening/ closing to prevent unauthorized use with:

- ID code + PIN code
- RFID smart card (option)
- Finger based biometrics (option)

Specific Key for Specific User

Each key can be restricted to certain User, ensuring safe & secure usage of important keys.

Two-Step Approval Setting

to allow double approval & verification from both Staff and Manager prior to removing specific keys.

Alarm Timer Setting

Set a time limit on each key to ensure that keys are returned on time (e.g. at the end of the shift or end of the day). A warning alarm will be sound when the key is not returned within the time limit.

Automatic Recording of User Activities

Key movements from each User can be automatically recorded into a data log*; when, by whom, and which keys are being removed and returned. Subsequently, the data log which details all records for the current or a given day can be printed for audit trail purpose.

*Up to 50,000 records (one key removal & return is considered as one record)

Smartly Designed to be Highly Intuitive & Informative

The cabinet status can be seen at a glance via the indicator light above the touch screen display.

The indicator light will glow **'Orange'** if a key has not been returned at the pre-defined time.

Each key holder is individually numbered ensuring keys are returned to the correct location.

A key can be removed when its corresponding light flashes blue. After the key is removed, the key number remains lit.

MAIN BENEFITS OF USING THIS PRODUCT

Maximum Safety & Security

with the combination of complete security control, configurable setting and parameter, as well as automatic alarm & notification system.

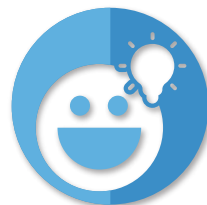

Increase Accountability & Reduce Risk

with restriction of key access to specific Authorized User and automatic recording of key usage.

Long-Term Investment & Lower Maintenance Cost

with Glory's well-known product quality, durability, and reliability.

Ready-to-Use Product

with its simple operation & user-friendly menu.

Why Glory?

100 years of Experience as a **Solution Provider** for Major Companies across Sectors

Strong Worldwide Presence spreading in more than **128 Countries** through **350 Business Partners**

40 years of Experience in **Indonesian Market**

High Durability with much longer life-time span

>1 million products in more than **100 countries**

Trusted by Worldwide Banking Solution Provider for technology of modules & components

Technical Specifications

PARAMETER	MEASURE
