

# SMARTARCHIVE™

## for Business

Optimize your business processes while greatly saving time & improving security with digitally archived documents.

With more than 26 years of proven expertise in cheque processing industry, we offer a more effective yet secure digital archival solution that gives you quick and easy access to all of your cheques' records and files.

**Time to embrace the paperless era and say good bye to these unnecessary problems**

### Longer process to access vital information

with tedious and time-consuming process in shifting through mountain of papers

### Costly process, questionable quality

The conventional archiving ways using paper copies, microfilm, or microfiche requires extra cost & efforts. In the long run, the readability of those paper archives is not guaranteed due to natural deterioration.

### Again, more cost for storage facility

with the need to provide a secure temperature- and humidity-controlled facility to store and preserve physical documents

## Digital Repository of Cheques for Easy Archival & Retrieval

Without having the physical cheques in hand, it is crucial to have digital copies of cheques that are easily available whenever required.

## Transformation to Digital

See how our solutions digitize your cheques in **Quick & Simple Flow**

1

### Process

- **Image Scanning** of both side of cheques in B/W, greyscale, and colour
- **MICR Reading** to capture cheques' information for easy search & view
- **OCR Reading** to scan voucher

2

### Repository

- **Database Storage** of cheques' image & data
- **Search & View** with flexible search criteria, such as name, account, amount, date, etc.
- **Data & Image Export** for further processing or integration

3

### Report

- **Report Generation**
- **Log of Archival Activities** for audit trail purpose

# How Does Our Solution Benefit Your Business?

## Quick & Easy Access to Documents, at any time from any place

Finding the right documents is now easier than ever. With flexible searching criteria, you can easily retrieve the required data & image of cheques from a central digital repository within seconds.

## Great Reduction on Costs

by eliminating the need to provide dedicated storage facility and unnecessary cost for maintaining physical documents.

## Long-Term Availability of Information

Our solution ensures all of your business information accessible into the future as digital data & images are not prone to physical degradation due to mishandling or environmental factors.

## Even More Benefits with These Optional Features

## Improved Traceability with ONLINE DATA VIEWER

that enables unlimited User to search, view, and export reporting data through web portal, accessible via LAN/ WAN.

## Central Repository of Data with CENTRALIZED ARCHIVAL CENTER

Cheques' data & images from Branches can be sent to central database at the Head Office based on configurable interval.

## Wide Range of Cheque Scanner Options

to suit various cheque processing volume
